Define the Problem Statements

Date	28 August 2026
Project Name	Employee Raise Issue
Maximum Marks	2 Marks

Customer Problem Statement Template:

Employees in an organization often encounter various challenges such as IT-related issues, HR concerns, payroll discrepancies, or facility-related problems. At present, there is no unified and user-friendly system for employees to raise these issues, ensure they reach the appropriate department, and track their resolution status.

This lack of a streamlined process leads to:

- Delays in issue resolution
- Confusion about responsibility and ownership
- Reduced employee satisfaction and productivity

Our project aims to analyze these difficulties from the employee's perspective, identify pain points in the current reporting process, and design a solution that simplifies issue submission, assignment, and tracking.

Employee Issue Problem Statement

PS-1
An employee who faces a workplace issue

- I'm trying to
Raise my issue to the correct department
- But
I don't know whom to contact to report my issue
- Because
There is no simple and centralized system to raise issues
- Which makes me feel
Confused and frustrated

Example:

PS-1

I am (Customer)	An employee who faces delays in salary processing
I'm trying to	Get my payroll issue resolved quickly
But	I don't know which department handles payroll queries
Because	There is no transparent system to raise and track payroll issues
Which makes me feel	Anxious and dissatisfied
